leapwork

The Smartest Way to
# Modernize Software Testing

Test faster and more effectively with AI-powered
test automation

Every moment, billions of dollars flow through digital businesses. In these interconnected software ecosystems, even the smallest defect can disrupt this flow. We help software testing teams to ensure continuous quality so customers move seamlessly from application to application, keeping business operations uninterrupted.

Software testing teams rely on Leapwork to build, manage, maintain, analyze, and scale automated software testing. By providing composable visual test flows and generative AI capabilities, everyone from engineers to business users can quickly and efficiently ensure quality experiences end-to-end.

Codeless, AI-Powered

Leapwork's visual test flows help teams validate quality across customer journeys, including AI apps like Copilot.

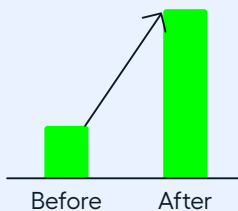

Industry leaders trust Leapwork

Change the economics of software testing

✅ **Test any application**
Eliminate testing gaps caused by siloed tools and teams with unified testing across applications and APIs.

✅ **End maintenance pain**
Automatically adapt to changes in the application under test (AUT) and easily reuse test flows without rewriting scripts.

✅ **Test faster**
Go from days to minutes with simplified testing powerful enough for the most complex data-driven use cases.

✅ **Constantly improve**
Analyze test performance with detailed logs and video replays to refine and advance best practices.

✅ **Let AI make it easier**
Reduce test efforts with AI-driven validation of test results and data extraction, generation, and transformation.

✅ **Reduce cost & risk**
Eliminate the cost of open source "tax" and tool sprawl with no-code comprehensive end-to-end testing.

**175% increase in product enhancements**

Hillebrand GORI

Deliver value. Lower TCO.

"Leapwork's no-code experience for test creation empowers a broader percentage of our customers to effectively implement automated testing. Enhancing the quality of their Microsoft Dynamics 365 service experience and lowering the Total Cost of Ownership through Leapwork is a win-win opportunity."

Mike Ehrenberg
Technical Fellow & CTO of MSFT D365 Apps Group

Microsoft

One platform for continuous quality

Every user empowered
Developers, application owners, QA teams, and business users.

Unifying visual context
Data-driven software testing in the context of customer journeys.

Test flow analytics
Monitoring and reporting of all execution results.

Any modality
Web, Mobile, Desktop.

Any application
Custom, business packaged, and AI apps.

Generative AI
AI-driven validation of test results and data extraction, generation, and transformation.

Scalable platform for automation
Securely building, maintaining, managing, and scaling automation flows.

Flexible deployment options
Let us do the heavy lifting with Leapwork Cloud. Or deploy on-premises for full control.

Professional services
Go faster with onboarding assistance and a dedicated team to build your first test.
